

CZ-Cities Alliance Network (CAN) meeting

Tuesday, June 2nd 2026
16:30 to 18:00

Within URBIS smart cities fair in Brno - Archimedes room

Unaffordable housing, rising energy costs and the transition towards climate neutrality are among the greatest challenges facing today's cities. How can cities respond through innovation, participation and energy-sustainable development?

Prague and Munich will present concrete experience with the development of energy-positive and carbon-neutral districts. The discussion will offer a practical perspective on how affordable housing, citizen participation, energy self-sufficiency and climate responsibility can be connected in urban development.

Moderator: Wojciech Belch, Head of the Participatory Planning and Design Research Team, CTU UCEEB

Simultaneous interpretation English-Czech

Registration: <https://forms.cloud.microsoft/e/8S5CnmxcQq>
